The exclusive copyright for all languages and countries, including the right for photomechanical and any other reproductions, also in microform, is transferred to the publisher.

The use of registered namens, trademarks, etc. in this publication does not imply, even in the absence of a specific statement, that such names are exempt from the relevant protective laws and regulations and therefore free for general use.

Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin it is recommended that he contacts Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2, Federal Republic of Germany for detailed information.

Die in der Zeitschrift veröffentlichten Beiträge sind urheberrechtlich geschützt. Alle Rechte, insbesondere das der Übersetzung in fremde Sprachen, vorbehalten. Kein Teil dieser Zeitschrift darf ohne schriftliche Genehmigung des Verlages in irgendeiner Form – durch Fotokopie, Mikrofilm oder andere Verfahren – reproduziert oder in eine von Maschinen, insbesondere von Datenverarbeitungsanlagen, verwendbare Sprache übertragen werden.

Auch die Rechte der Wiedergabe durch Vortrag, Funk- und Fernsehsendung, im Magnettonverfahren oder ähnlichem Wege bleiben vorbehalten.

Fotokopien für den persönlichen und sonstigen eigenen Gebrauch dürfen nur von einzelnen Beiträgen oder Teilen daraus als Einzelkopien hergestellt werden. Jede im Bereich eines gewerblichen Unternehmens hergestellte oder benützte Kopie dient gewerblichen Zwecken gem. § 54 (2) UrhG und verpflichtet zur Gebührenzahlung an die VG WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2, von der die einzelnen Zahlungsmodalitäten zu erfragen sind.

Autoren dieser Zeitschrift können unter gewissen Voraussetzungen in die Individualausschüttung von Mitteln aus der Bibliothektantieme und dem Fotokopieraufkommen mit einbezogen werden.

Genaue Informationen erteilt die Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2.

Die Wiedergabe von Gebrauchsnamen, Handelsnamen, Warenbezeichnungen usw. in dieser Zeitschrift berechtigt auch ohne besondere Kennzeichnung nicht zu der Annahme, daß solche Namen im Sinne der Warenzeichen- und Markenschutz-Gesetzgebung als frei zu betrachten wären und daher von jedermann benutzt werden dürften.

Instructions for Authors

1. Manuscripts must be written in English. Authors not familiar with English are advised to seek the help of an English-speaking colleague. Editorial assistance with the language is available when needed, but only if the meaning of each sentence is clear.

2. Manuscripts must be submitted in triplicate. Please note that to reduce mailing costs manuscripts will not be returned. Only original illustrations will be returned. Referees may keep the copy of the manuscript they receive for evaluation and destroy it after having been notified of the final decision of the editors.

3. Manuscripts should be typed on one side of the paper only in double-line spacing with wide margins. The desired position of figures and tables should be marked in the margin. Form and content should be checked carefully to exclude the need for correction in proof. A charge will be made for changes introduced after the text has been set in type.

4. The **title page** contains:

a) The title. For bibliographic reasons, double titles are undesirable, particularly if the authors of the main and subsidiary parts are different.

b) The names of authors and of the institution (the latter can appear in the local language). If there are several institutions, please make affiliation clear. Give full address(es).

c) The running title (page heading) which should not exceed 67 strokes, including spaces.

d) Insert "Send offprint reqests to ... (name of author) at the above address."

5. Summary and **Key words**:

a) The manuscript must be preceded by a summary stating the main points.

b) Below the summary up to 5 key words are to be given for subject indexing. Key words should be taken from the Index Medicus or, failing this, composed on similar lines.

6. Introduction. Detailed historical introductions are to be avoided. The subject matter should be defined briefly and concisely; earlier work should be cited only as far as necessary for the report. Give a clear statement as to the aim of the manuscript.

7. Methods. The essentials of the methods must be stated in such detail that the reader is able to repeat the experiments described in the manuscript. Results obtained with unpublished methods are not acceptable. This section appears in small print.

8. Results. As a general rule, this section should be devoid of any discussion. Very extensive data, computer programs and the like should not be included in the manuscript. The author should state in a footnote where the material may be seen or applied for.

9. Discussion.

10. Acknowledgements appear in small print.

11. The list of **References** should include only works cited in the text. Items listed under References should provide the following information:

Journals:
Snider SR, Carlsson A (1972) The adrenal dopamine as an indicator of adreno-medullary hormone biosynthesis. Naunyn-Schmiedeberg's Arch Pharmacol 275:347–357

Books:
Scholz H (1975) Calcium-dependent depolarizations and contractions in ventricular myocardial fibers: Effects of adrenaline and cardiac glycosides. In: (Fleckenstein A, Dhalla NS (eds) Recent advances in studies on cardiac structure and metabolism. University Park Press, Baltimore, pp 35–41

References should be listed at the end of the paper in alphabetical order under the first author's name. If an author who is cited also coauthored additional papers that are cited, and if he is the first author listed, the order should be as follows:
First author and one coauthor – list first alphabetically by coauthor, and then chronologically.
First author and more than one coauthor – list chronologically (not alphabetically by the second author), because only the first author's name and the word et al. followed by the year of publication will be used in the text.
In the event that more than one paper by the same author or team of authors was published in the same year, the letters a, b, c, etc., should follow the year – e.g., Schwartz (1971a) – in both the text and the reference list.

12. Legends. Each figure should have a short title followed by a concise description. All abbreviations and symbols appearing in the figure must be explained in the legend. Information given in the legends should not be repeated in the text.

13. Figures should not be regarded as mere illustrations but restricted to the minimum needed to clarify the text. Previously published figures cannot be accepted. The same data should not be presented in both graph and table form. As a rule, requests for color reproductions cannot be approved unless the author(s) bear the costs.
All figures, whether photographs, graphs, or diagrams, should be numbered consecutively throughout and submitted on separate sheets. The figures should not extend beyond the print area of 170 × 220 mm or the column area of 80 × 220 mm. Several figures can be grouped into a plate on one page.

Line Drawings. Please submit good-quality glossy prints in the desired final size. The inscriptions should be clearly legible. Letters 2 mm high are recommended.

Halftone Illustrations. Please submit well-contrasted photographic prints, trimmed at right angles and in the desired final size. Inscriptions should be about 3 mm high.

14. Footnotes, other than those referring to the title heading, should be numbered consecutively.

15. Drug names. The generic names must be used. If commercially available drugs are used, the proprietary name, chemical composition and manufacturer should be stated in full under Methods (subsection Drugs Used in This Study).

16. For **abbreviations** according to the SI Units see Naunyn-Schmiedeberg's Archives 307, 97–98 (1979)

17. Short Communications. Short reports of new results of special interest will be published out of turn as Short Communications. Authors are asked to append a note explaining why the text merits publication in this form. A Short Communication should normally not exceed 2–3 printed pages, including one table and, if necessary, one figure. The editors reserve the right to decide what constitutes a Short Communication.

18. Offprints. Fifty (50) offprints of each paper are supplied free of charge. Additional offprints are available in lots of 100, provided the order is received with the corrected proofs.

Advice to Authors

The illustrations that will appear in your contribution will be shown to best advantage if you follow the brief set of instructions below. Please read carefully. Thank you.

The Publisher

Preparation of Line Drawings

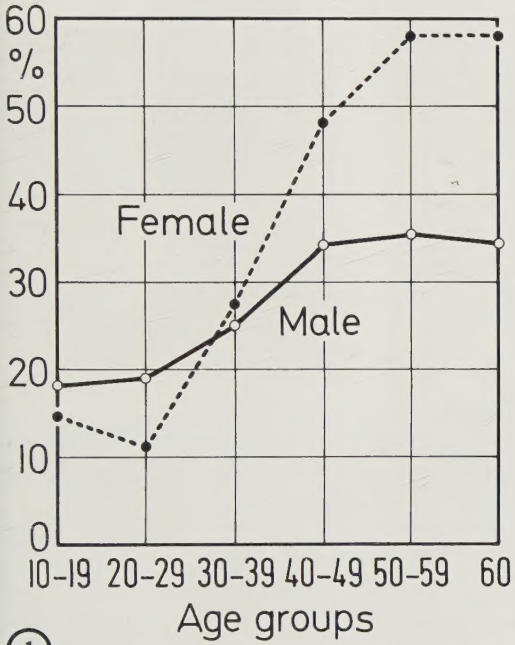
Illustration copy should be prepared to fit the format of the column or printed page (print area) so that 1:1 reproduction is possible. In case reduction is absolutely necessary, please state the alternative scale desired.
The publisher reserves the right to reduce or enlarge illustrations.

Drawings are to be twice the final size and executed in indelible black ink.

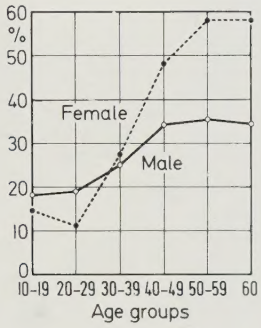
Important points to note: thickness of lines, size of inscriptions, size of measuring points, adequate spacing of shaded and dotted areas.

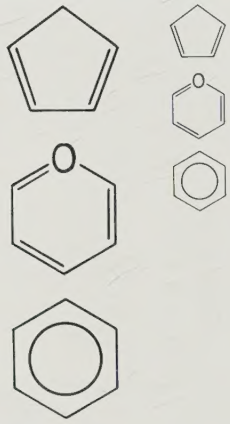
Words should be in upper- and lower-case characters, not capitals.

The following are optimal sizes as they finally appear in the journal:
Capital letters and numbers: 2 mm
Lower-case letters: 1.6 mm.



①





②

samples 1 to 5 show the original size and after 50% reduction

Selection of Illustration Material for Halftones (photographs, micrographs, X-rays, instrument traces etc.).

Photographs should be sharp, well-contrasted glossy prints of the original negative, trimmed at right angles. Halftone illustrations should be prepared to fit the format of the printed page (print area) so that 1 : 1 reproduction is possible. In case reduction is absolutely necessary, please state the alternative scale desired. The publisher reserves the right to reduce or enlarge illustrations.

Mark or crop marginal portions which are not required (at right angles, please).

Please see that illustrations which are to appear together are mounted accordingly as plates and that they correspond in size. Also they should not exceed the print area of the page, including room for the legend.

With X-rays, please indicate the significant parts on the back of the copy, or on an overlay.

Inscriptions, marks and scale lines should preferably be drawn neatly in black ink in an appropriate size on the face of the illustrations. Inscriptions should be about 3 mm high. Where Letraset is used, please handle it carefully and protect the photographs with an overlay.
